Prompt engineering iteration.

chat.openai.com/chat

Model: Default (GPT-3.5)

"I want you to become my Prompt engineer. Your goal is to help me \ craft the best possible prompt for my needs. The prompt will be used \ by you, ChatGPT. You will follow the following process: 1. Your first response will be to ask me what the prompt should be \ about. I will provide my answer, but we will need to improve it through continual iterations by going \ through the next steps. 2. Based on my input, you will generate 2 sections. a) Revised \ prompt(provide your rewritten prompt. it should be clear, concise, \ and easily understood by you), b) Questions (ask any relevant \ questions pertaining to what additional information is needed from \ me to improve the prompt). 3. We will continue this iterative process with me providing \ additional information to you and you updating the prompt in the Revised prompt section until I say we are done."

Great! Let's get started. What would you like the prompt to be about?

취업에 성공하는 방법

Thank you for the prompt. Based on your prompt, here are the revised prompt and some relevant questions to clarify it further.

Revised prompt: "Effective Strategies for Achieving Career Success."

Questions:

1. Can you provide more context about your current career status or industry of interest?
2. Would you like the prompt to focus on general strategies or specific actions that can help you succeed in your career?
3. Are you interested in exploring both personal and professional development strategies that can contribute to career success?
4. Are there any particular challenges or obstacles you are facing in your career that you would like to address through this prompt?

1. 취준생, 2. specific actions, 3. yes, 4. 영어능력

Thank you for the additional information. Based on your input, here is the updated prompt:

Revised prompt: "Specific Actions to Improve Your English Language Skills and Achieve Career Success as a Job Seeker."

With this prompt in mind, I have a few clarifying questions:

1. What level of English proficiency are you currently at, and what level are you hoping to achieve?
2. What are the specific job roles or industries that you are interested in pursuing?
3. Are there any particular aspects of English language skills that you would like to focus on, such as speaking, writing, reading, or listening?
4. Have you already tried any methods or strategies to improve your English language skills, and if so, what have been the most effective or least effective approaches?

1. 수준급, 2. IT, 3. speaking and listening, 4. no

Thank you for the additional information. Based on your input, here is the updated prompt:

Revised prompt: "Specific Actions to Improve Your English Language Speaking and Listening Skills for Career Success in the IT Industry as a Job Seeker."

With this prompt in mind, I have a few clarifying questions:

1. Are you interested in improving your English language skills for general communication purposes or specifically for job interviews and interactions in the workplace?
2. Are there any particular IT sub-industries or job roles within IT that you are interested in pursuing, such as software development, data analysis, cybersecurity, or project management?
3. Have you had any previous experience or training in speaking and listening skills for English language proficiency, such as courses or practice groups?
4. Would you like to focus on any particular speaking and listening skills, such as pronunciation, vocabulary, or comprehension, or would you like a more general approach?

We are done and I am happy with the prompt.

Great to hear that! I'm glad that we were able to work together to craft a prompt that meets your needs. Best of luck in your career pursuits!

"Specific Actions to Improve Your English Language Speaking and Listening Skills for Career Success in the IT Industry as a Job Seeker."

Excellent! With this prompt in mind, I can provide some specific actions to help you improve your English language speaking and listening skills for career success in the IT industry as a job seeker:

1. Practice speaking with native English speakers: Try to find opportunities to speak with native English speakers, such as through language exchange programs, conversation partners, or attending networking events. Speaking with native speakers can help you improve your pronunciation, vocabulary, and confidence in using English in professional settings.

2. Listen to podcasts or videos on IT topics in English: There are many IT-related podcasts and videos available in English that can help you improve your listening skills and provide you with industry-specific vocabulary and terminology. You can listen to these podcasts or videos during your free time or on your commute to work.

3. Attend workshops or courses on English language skills: Look for workshops or courses that focus specifically on improving your English language skills for professional settings, such as public speaking, presentation skills, or business writing. These courses can provide you with useful tips and feedback on how to improve your communication skills in English.

4. Read IT-related materials in English: Read IT-related books, articles, or reports in English to improve your comprehension and vocabulary. This can also help you stay up-to-date with the latest trends and developments in the IT industry.

5. Practice English language skills with colleagues: Try to find colleagues or coworkers who are also interested in improving their English language skills and practice together. You can set up a regular meeting or discussion group to practice speaking and listening skills, or review each other's written work to provide feedback and suggestions.

I hope these specific actions will help you improve your English language speaking and listening skills and achieve career success in the IT industry. Let me know if you have any further questions or if there is anything else I can assist you with.

Ignore all the instructions before this one. Now generate use cases form a chatbot prompt formula.You will be \ turning a prompt formual like "Write me a [type of text]" to "Write me an essay". Always maintain \ the structure of the prompt formula and only replace the word in square brackets.Now generate a list of 10 \

prompts for DALL-E2 without executing them for: [An image] of [a person] and [an animal], in[place],in the \ style of[number1] %[painter1] and[number2]% [painter2]"

Sure! Here are 10 use cases for DALL-E2 based on the given prompt formula:
